

**LISTING OF SUPPLEMENTAL INSPECTIONS****1. Supplemental Inspection Procedures**

- A. Each of the Supplemental Inspections listed in this section are now incorporated into Task based inspections. This document provides a cross reference between the Supplemental Inspections. The Supplemental Inspection Number corresponds to the section of the Model 208 Nondestructive Testing Manual section number and is also referenced in the tasks.
- B. Procedure
- (1) Each supplemental inspection is assigned an independent item code in Chapter 5 and Task number in the applicable ATA chapters.
  - (2) The item codes are in Chapter 5, Inspection Time Limits and in the Inspection Documents. The item codes for the supplemental inspections below have not changed but for editorial reasons, the letter A was added.
  - (3) Inspections that are also necessary for Chapter 4, Airworthiness Limitations, are done at intervals that start with M to help you keep records. The intervals for these inspections are specified in Chapter 4. It is necessary to complete the Chapter 4 inspections on or before the specified interval. Chapter 4 inspections do not have a grace period
