## SCHEDULED SERVICING - DESCRIPTION AND OPERATION

## 1. General

A. This section provides instructions necessary to carry out scheduled servicing as well as internal/external cleaning. It also includes instructions for lubricating specific points identified in periodic inspection and/or preventive maintenance programs. This section does not include lubrication procedures required for the accomplishment of maintenance practices.

## 2. Description

- A. This section is subdivided to provide maintenance personnel with charts, text and illustrations to prevent confusion. Also included in this section is a table containing a list of lubricants.
  - (1) The subdivisions are separated according to airplane systems. This aids maintenance personnel in locating service information.
