

FIRE PROTECTION - GENERAL

1. Scope

- A. This chapter provides maintenance of components which detect and alert flight crew to an engine fire.

2. Definition

- A. This chapter is divided into sections to assist maintenance personnel in locating specific systems and information. The following is a brief description of each section. For locating information within the chapter, refer to the table of contents at the beginning of the chapter.
 - (1) The section on fire detection provides information on the fire detection loop, fire detection control box, fire alarm, fire detector light and generator overheat detection.
 - (2) The section on fire extinguishers provides description and operation information of hand fire extinguishers.
