## GARMIN G1000 GIA 63W/64W INTEGRATED AVIONICS UNIT - ADJUSTMENT/TEST

## 1. General

A. This section contains adjustment and test procedures for the two Garmin G100 GIA 63W/64W Integrated Avionics Units, GIA 63W/64W No.1 and GIA 63W/64W No.2.

## 2. Tools and Equipment

A. Tools and Equipment

NOTE: For the supplier publication part number and manufacturer data, refer to the Introduction - Supplier Publication List.

- (1) Tools and Equipment
  - None.
- (2) Special Consumables

None.

- (3) Reference Material
  - Chapter 22, Garmin GFC 700 Automatic Flight Control System Adjustment/Test
  - Chapter 23, Garmin G1000 VHF Communication System Adjustment/Test
  - Garmin GTX 33 Transponder System Adjustment/Test
  - Garmin G1000 VHF Navigation System Adjustment/Test
  - Garmin G1000 Global Positioning System Adjustment/Test
  - Bendix/King KN 63 DME System Adjustment/Test
  - Bendix/King KR 87 ADF System Adjustment/Test
  - Garmin G1000 Integrated Avionics System Adjustment Test.

## 3. Garmin GIA 63W/64W Integrated Avionics Unit Operational Check

- A. If one of the two Garmin GIA 63W/64W Integrated Avionics Units has been replaced or reinstalled in a different position, do the steps that follow:
  - (1) Do the G1000 Baseline Software/Configuration Load. Refer to the Garmin G1000 Integrated Avionics System Adjustment Test.

NOTE: If the GIA 63W/64W Integrated Avionics Unit has been removed and installed in the same position, there is no need to do the Garmin G1000 Line Replaceable Unit (LRU) Software Configuration/Installation.

- (2) Do the G1000 Architecture Verification Check. Refer to the Garmin G1000 Integrated Avionics System Adjustment Test.
- (3) Do a check of the Garmin GFC 700 Automatic Flight Control System. Refer to Chapter 22, Garmin GFC 700 Automatic Flight Control System Adjustment/Test.
- (4) Do a check of the Garmin VHF Communication System. Refer to Chapter 23, Garmin G1000 VHF Communication System Adjustment/Test.
- (5) Do the Garmin G1000 VHF Navigation System Adjustment/Test.
- (6) Do the Garmin G1000 Global Positioning System Adjustment/Test.
- (7) If the GIA 63W/64W No. 2 was replaced do the checks that follow:
  - (a) Bendix/King KN 63 DME System Adjustment/Test.
  - (b) Bendix/King KR 87 ADF System Adjustment/Test.
