

KING KT-70 TRANSPONDER - REMOVAL/INSTALLATION

1. General

- A. This section covers the removal and installation of the King KT-70 transponder.
- B. The transponder is located in the center console.

2. KT-70 Transponder Removal/Installation

A. Remove Transponder.

- (1) Disengage circuit breaker XPDR 1 on lower left circuit breaker panel.
- (2) Loosen set screw securing transponder.

NOTE: Transponder set screw is accessed from the transponder front panel using a long hex wrench.

- (3) Lift transponder from rack.
- (4) Remove transponder from airplane.

B. Install Transponder.

- (1) Put the transponder in the mounting rack. Engage the set screw in the front panel with a long hex wrench.
- (2) Fasten the transponder in rack.

CAUTION: Hand tighten set screw only. Avoid over torquing or damage may result.

- (3) Engage circuit breaker XPDR 1 on left circuit breaker panel.
